DETAILED ACTION

1. This action is in response to Applicant's Amendments, filed on September 17, 2007 have been considered but are deemed moot because of Restrictions Request below.

Election/Restrictions

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed (37 CFR 1.143). Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 3-13, drawn to a method for processing of business metrics information system with displaying a status of the business metrics which is processing of data in database, classified in class 707, subclass 200,
- II. Claims 39-46, drawn to a method for processing a data to generate business metrics and transmit a status of the business metrics to the user device, which is distribution of data, classified in class 707, subclass 10.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instance case, invention I can be used for processing of business metrics information system with displaying a status of the business metrics which is processing of data in database. Invention II can be used for processing a data to generate business metrics and transmit a status of the business metrics to the user device, which is distribution of data. See MPEP 806.05(d).

4. Because these inventions are distinct for reasons given above and have acquired separate status in the art as shown their different classification, restriction for examination purpose as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II each other, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2166

7. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed (37 CFR 1.143).

8. Applicants is reminded that upon the cancellation of claims to be non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (i).
